## Unlocking and Maximizing Your Data for Oil and Gas

*Niaz Tadayyon*

*Business Analytics Practice Lead at Cadeon Inc. 800 5 ave*

### Summary

Is finding and accessing your Geological Data a challenge for you? Are you still using spreadsheets to do advanced calculations with untrustworthy data?

In this presentation, Cadeon will be discussing the approaches we are using with more than 20 Oil and Gas customers to resolve this major challenge giving you back time in your day to make decisions with trustable data.

We will also be demonstrating an approach that unlocks data from all vendor based technologies allowing you to be able to highlight more of value stream that will provide more accurate results in your decision making.

Please join us to learn this game changing approach.

### Theory and/or Method

Transformational Approach

Introspect and Discover data sources

Iterate over data sources

Build virtual views

Publish virtual views

Test

Application gets data from CIS

### Examples

Data Federation

DW Extension

Data Virtualization Layer

Big Data Integration

Cloud Data Integration
